

ABIBLUE NF – BLUE, NEW, EFFECTIVE!

ABIBLUE NF saves time and money by combating the build-up of weld spatter on workpieces in a particularly effective manner. It contains a blue colour indicator to instantly show welders if a workpiece is moistened with anti-spatter fluid – without affecting the welding process of course! The bonding component contained in ABIBLUE NF always ensures sufficient adhesion, even on smooth surfaces, and yet can still be easily removed with water. ABIBLUE NF is non-hazardous and readily biodegradable, making it particularly environmentally friendly.

Try it for yourself!

**ABICOR
BINZEL** 

ABIBLUE NF – key benefits

- Colour-indication for easy identification of a complete coating of the work piece
- Non-flammable – complies with ABICOR BINZEL NF standards
- Free of silicone
- Can be washed-off with water
- Ready-to-use composition
- Below labelling limits – no transport, storing or using restrictions
- Suitable for all welding and laser cutting processes
- Ability to weld coated surfaces confirmed by an independent testing institute
- Long-term stable emulsion
- Biodegradable

Description	Part-No.
ABIBLUE NF emulsion, 5 litres, canister	192.0238.1
ABIBLUE NF emulsion, 10 litres, canister	192.0239.1
ABIBLUE NF emulsion, 20 litres, canister	192.0240.1
Spray bottle metal, without contents, 400 ml	192.0163
Spray bottle, plastic, without contents, 500 ml	192.0254.1
Outlet tap for 20 litre canisters	192.0191.5
